A reader’s guide to the historical sources

Use the chapter links to read the archive in its original languages. Dates, authors and document types help distinguish a contemporary report from a later interpretation.

Contents

1. Beter’s book on the dollar (1973)
2. An excerpt from Audio Book No. 1 (1974)
3. The cassette notice (1984)
4. Air Booms in the magazine archive (1978)
5. Two other voices in the collection
6. Earlier translations and selections

Beter’s book on the dollar (1973)

George Braziller published Peter David Beter’s The Conspiracy Against the Dollar in 1973. Its four chapters take the reader from international strategy and economic power to the relationship between economics and politics, and finally to stagflation. The heading of each chapter gives you a way to test how the author connects a dated event to his interpretation. The original index is useful for tracing a name across chapters.

- Foreword
- Geostrategy
- Economic strategy
- Economic politics
- Stagflation
- Epilogue
- Index

An excerpt from Audio Book No. 1 (1974)

In this excerpt Beter addresses listeners who share his expectation of a depression and a war. The three sections show how that expectation shaped his thinking about supplies, liquid assets and savings. They document advice addressed to his audience in 1974.

- Basic necessities
- Liquid assets
- Savings

The cassette notice (1984)

On 6 January 1984 NewsAlert printed a notice from Audio Books, Inc. It describes complete, unaltered Audio Letter cassette copies carrying a trademark acknowledgment. It separately names the Audio Book and Special Tapes series and limits the statement to the producer's own rights. Read all three parts together when tracing the history of these recordings.

- Notice
- Conditions
- Limits

Air Booms in the magazine archive (1978)

The page contains three scans from the April 1978 issue of Science Digest. Start with the printed pages to see exactly what the magazine reported. The archive's introduction adds Beter's interpretation of the noises and can be read alongside the article.

- Scan 1
- Scan 2
- Scan 3

Two other voices in the collection

John Coleman wrote the book about the alleged Committee of 300. The archive holds an excerpt and a longer text. A separate page preserves Benjamin Freedman’s 1961 speech in fourteen audio tracks, including questions from the audience. Attribution matters here. These records document what the speakers asserted, including prejudicial generalizations that call for independent scrutiny.

- Coleman · excerpt
- Coleman · book
- Freedman · speech
- Freedman · questions

Earlier translations and selections

The Czech collection links excerpts from four numbered letters and a larger mixed Czech and Slovak compilation. The German and Spanish archive pages offer older overviews of the series. Use the language directory for the modern reading editions.
